S-Moove: equip your Multi Van

Freedom to travel, live, and customize your space

S-Moove is a modular system that enhances your **Multi Van** with **smart and versatile solutions**, turning it into a **comfortable and enjoyable place to be: perfect for everyday life!**

All of this with no permanent modifications and **no need for certification.**

With S-Moove, you can configure your Multi Van in multiple ways, making it **perfect for everyday use, work, or travel.**

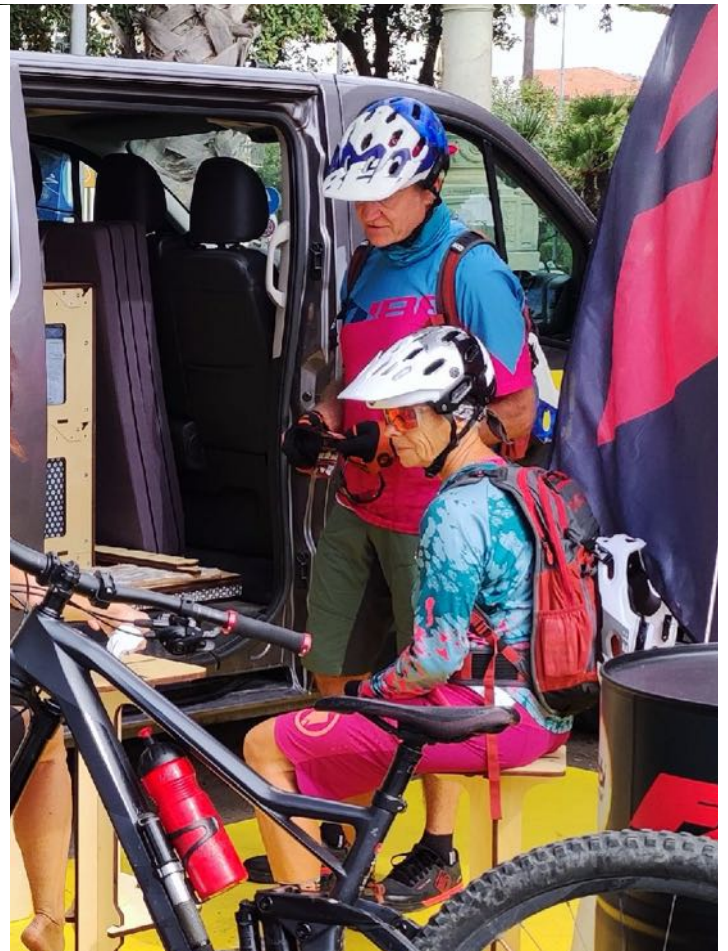

Multi Vans: space for every purpose

M: large cargo capacity and suitable for everyday use

S-Moove setups are designed to give you **maximum freedom and flexibility**, allowing you to **install, adjust, or remove them easily**, adapting the space to your needs.

The modular furniture is intuitively designed, offering **versatility and customization**, both on the road and in everyday life.

Setup: quick and easy steps

A practical and fast system, suitable for everyone

The floor and modules are **easy to transport**, install in just a few steps, and allow you to reorganize your space at any time.

You can quickly switch from everyday use to a travel-ready setup by moving, combining, and redistributing the modules to create the ideal arrangement every time.

Create your custom van setup whenever you want.

Every journey is unique

Organize your space and follow your idea of comfort

Only you know exactly what you need, we provide the tools to equip your space, and you decide how to configure it based on your needs each time. **That's S-Moove!**

- ✓ Fully configurable spaces with repositionable furniture
- ✓ No structural modifications to the vehicle
- ✓ Durable and sustainable materials
- ✓ Perfect for your Multi Van and also reusable elsewhere
- ✓ If you change vehicle, your S-Moove kit moves with you

Zoned Flooring

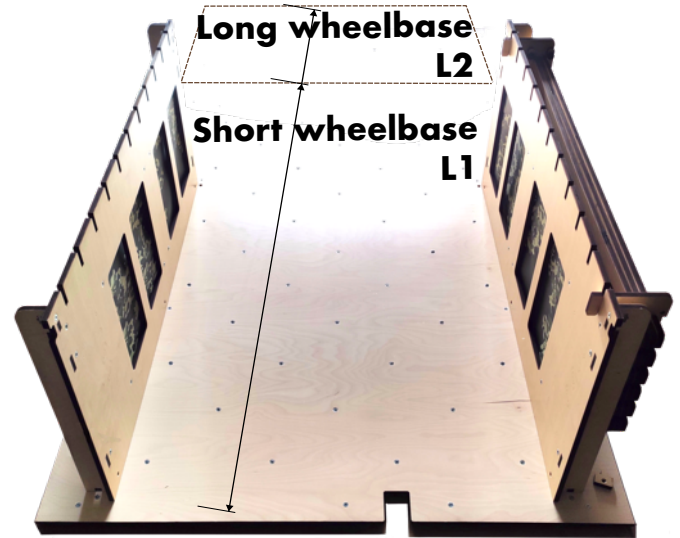

The core of the system

The flooring is placed on top of the vehicle's standard flooring, with the removal of passenger seats when permitted by the manufacturer.

It allows **quick and secure attachment of modules** anywhere on its surface.

Designed for the different lengths (L1, L2) of vehicles in this category.

The flooring includes **two side panels** that regulate the perimeter around the wheel arches and serve as part of the bed structure.

Longitudinal bed

Removable and easy to pack away: zero clutter!

The bed consists of **extensions, slats, and a mattress.**

The extensions fit into the side panels of the flooring. **The slats**, lightweight and easy to handle, can be stored away to free up space during the day. **The mattress** is sectioned for convenient storage.

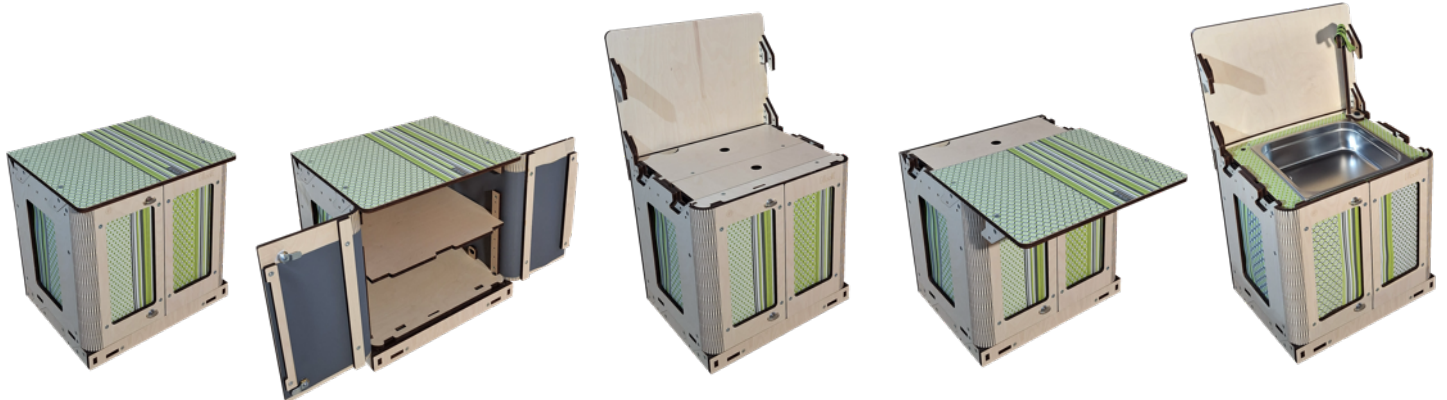

Multifunctional furniture modules

Independent, movable and modular

They allow you to organize your space in a flexible and functional way. Designed to be interchangeable, they are **same in shape and versatile in function**.

Each module works as a **storage unit, a seat, and has an extendable surface**; with specific accessories, it can become a **sink, a kitchen, or a toilet**.

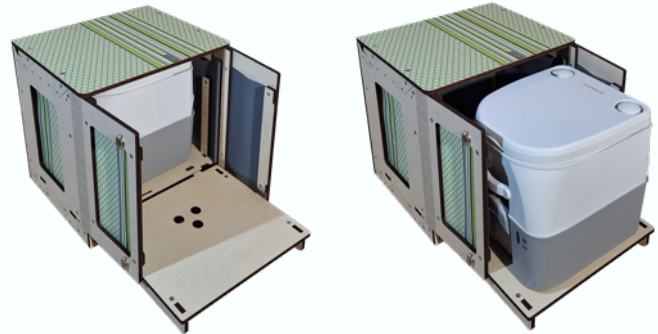

The WC module

A module like the others, but with an extra element

It has all the characteristics of the other modules and includes a **retractable platform** that allows you to position the toilet wherever it is most convenient.

You can stack additional modules on top of the WC module or use it as a **regular seat**.

Water system: The Cobra

A removable system that reaches everywhere

Starting from its tank, **it can reach any point in the van**, depending on where you position the sink. You can also use it for the shower, inside or outside.

The 10 Water System includes a 10-liter tank, a 12V submersible pump with pressure switch, a hose with a handheld faucet, and a matching storage bag.

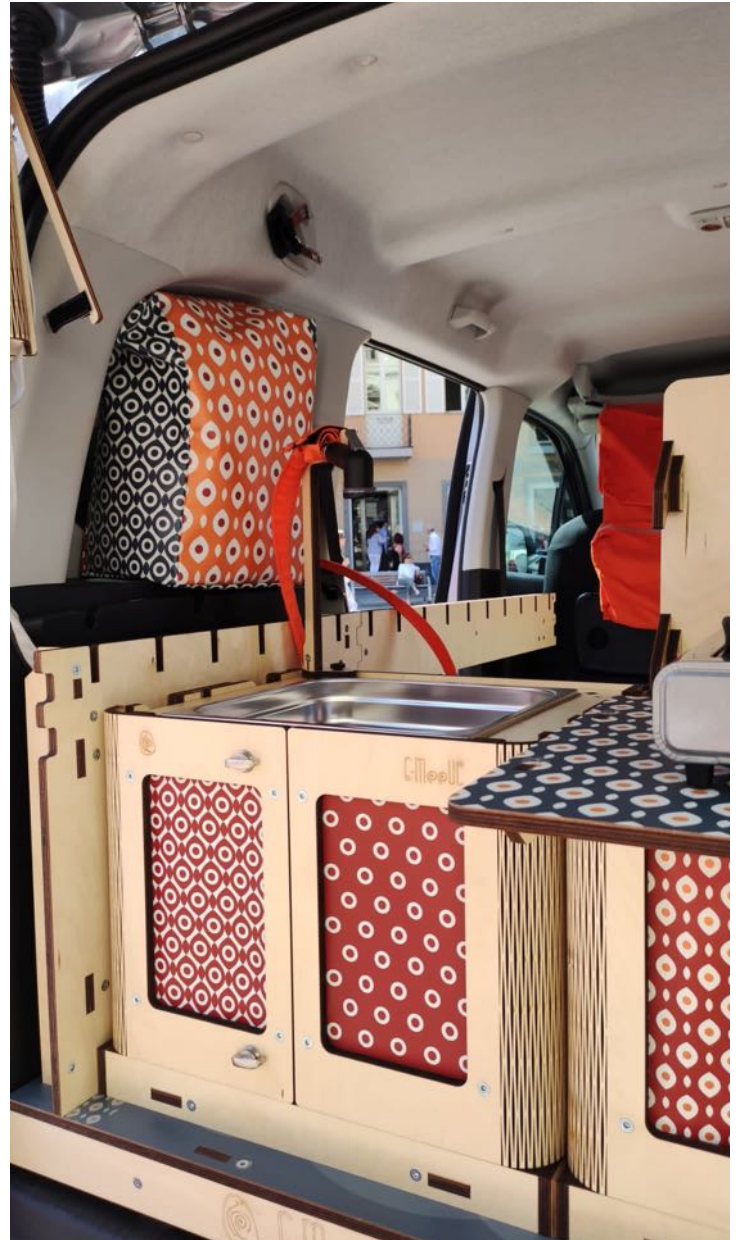

Table-Stool

Practical and ultra-compact

Practical and multifunctional: it can be used as a **table** or a **stool**, and when stored, it takes up minimal space.

A basic stool is also available, serving as a **lower stool**.

Wardrobe Tent

Light, spacious and easy to set up

Space is always limited, and wardrobe tents are perfect for **storing clothes in an organized and accessible way.**

You can wash them in the washing machine, prepare them at home, and hang them wherever you like in the van. You can also use them to **separate the driver's cabin or along the interior sides of the van.**

It also works as a curtain, shielding the windows for more privacy.

Uh...the shower!

You can set it up inside or outside, and when stored, it takes up very little space.

It is entirely contained in its bag, and inside, you'll find all the components folded. **The shower base** in PVC-coated fabric, with sides; **the pump** for draining water into the sink's tank; **the shower tent** with straps and clips to attach it.

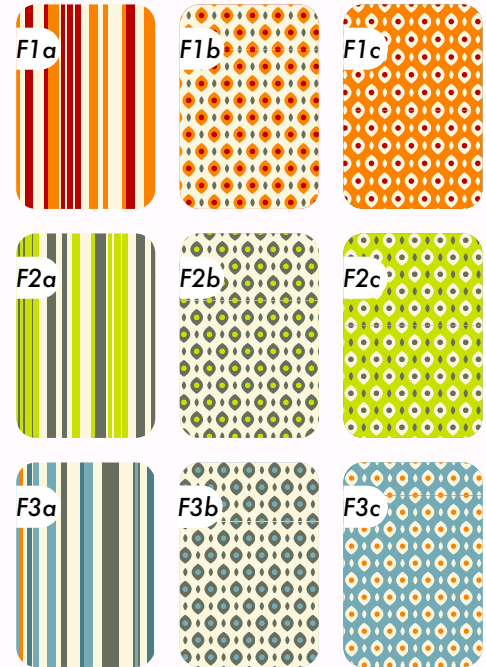

Graphics and Colors

Customize your setup

The new **2025 graphics "Fluid Patterns"** are designed to add movement without overwhelming the design, featuring **soft lines and refined patterns** that alternate harmoniously. Available in three color variations: **green, red, and blue**.

For a more minimalistic aesthetic, you can also choose **monochromatic options**.

On request, we create any type of graphic design for **full customization**.
We invite you to check out our graphic catalog on the website.

Not only for Van

Anywhere you like

S-Moove is designed to have multiple lives and never stay static. When not in use on the van, it becomes part of your home furnishings: **bedside table, desk, console, multifunctional container, or even a supplementary sink.**

Beautiful, practical, and versatile, it follows you everywhere. Use it in a **bungalow, a tent, or a loft.**

Hosting a garden party? Set up a buffet area with the modules, sink included!

Sustainability: Economic and Environmental

One vehicle, infinite solutions

S-Moove is the result of continuous product evolution, with the aim of offering the highest in terms of functionality, durability, and sustainability.

We have worked to ensure:

Genuine functionality, long life, and low environmental impact.

The materials we use are high-performing, repairable, and recyclable.

Reduction

we work to eliminate waste and only produce useful, multifunctional objects.

Reuse

every element can be used in various contexts: van, home, tent...

Recovery

each component guarantees maintenance, repair, and re-use.

Recycling

At the end of the product's life, all materials can be recycled.
